SITSD Reporting to ITMC

Information Owner
Name: **Chris Kuntz**
Organization & Work Unit: **DOA SITSD ETSB**
Phone: **406-444-2576**
Email: **ckuntz@mt.gov**
Website (if applicable):

Information	
☒ Informational ☐ Issue ☐ Action Needed ☐ Other:	Recommended Action ☒ Post to ITMC Site ☐ I would like to discuss at ITMC meeting ☐ Other:

Name of Service, Program, Project or Issue: **Email services from DOA SITSD**
Key Points (discussion): **Currently DOA SITSD is moving to a DAG configuration of the email service. This configuration of having three copies of customers data live and in two different geographical locations allows DOA SITSD to eliminate nightly backups.** **The space used for nightly backups is being reused to increase customer's mailboxes to 250MB from the standard 50MB at no additional cost to customers.** **The process of moving to the DAG configuration is in process and is going good to date.** ***What is a DAG? See FAQ site, link below.**
Impact: **Customers will receive larger mailboxes during the move to the DAG configuration and have a quicker recovery time in case of disaster.**
Key Dates: **See the schedule on the MINE IT PRO site for dates.** https://mine.mt.gov/it/pro/email/Exchange_2010_Information_and_Links/dagmigrationschedule.mcpx
Other information and list any attachments: **Here is a link to the FAQ site for this move.** https://mine.mt.gov/it/pro/email/Exchange_2010_Information_and_Links/exchange2010dagmigrationfaq.mcpx
